Our saltbox style is somewhat unique, with the living and dining areas running lengthwise through the home. This open design is perfect, allowing the light to penetrate the home through the glass along the living and dining areas, and with the skylights above. This home is spacious and very efficient with its use of floor space (3 bedroom/2 bath) in a small footprint. The main floor includes living, dining, kitchen, bedroom and bath with an open stairway to the balcony on the second floor. The second floor balcony overlooks the living and dining areas and guides you to the two bedrooms and bath. The gliding door off the kitchen and dining areas allows the outdoors in, with access to the deck to enjoy nature. We would be happy to customize this design to fit your needs and lifestyle.

The Smart Choice!
